Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, and 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Marumori et al (US 2003/0002413 A1)

Regarding claim 1, Marumori discloses an information recording apparatus (figs.1 and 9) , comprising:

a first portable electric power source (sections 0027-0029, 0045.0062) (the power saucer can be AC supply , DC supply by battery or power from an automobile)o

a first detector circuit for detecting remaining capacity of said first electric power source (sections 0027-0029) ;

an external power source terminal of a second electric power source, being connected to an outside (sections 0027-0029) ;

a second detector circuit for detecting that the second electric power source is supplied to said external power source terminal (sections 0027-0029)

a recording circuit for recording information on a removable optical medium (DVD)(section 0065); and

a finalizing process circuit for executing finalizing process for said optical recording medium by recording information on the medium when either or both the remaining capacity of said first electric power source or/ and voltage of said second electric power source is detected to be equal or higher than a predetermined value, in said first detector circuit and said second detector circuit, operation of finalizing process is started by said finalizing process circuit upon said optical medium and the finalizing process is made on read only optical disc (DVC-R or DVD write once) (sections 0025-0029, Fig. 4,6 and 11)

Further for claim 2, Marumori further teaches a final process to the optical medium when both the voltages of both of first power source and the external power source are higher than the predetermine value (sections 0027-0029, 0045, Figs. 4,6 and 11) .

Method claims 12 and 13 correspond to apparatus claims 1 and 2. Therefore method claims 12 and 13 are rejected by the same reason as a[plied to apparatus claims 1 and 2.

Regarding claim 10, Marumori further teaches that the information recording apparatus is a portable type recording apparatus integrated with a camera and the medium is a disc (Fig. 9).

Regarding claim 11, Marumori further teaches the information recording apparatus is a portable type recording apparatus and the medium is a disc (Fig. 1).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
